In combination with other limitations of the claims, the cited prior arts fail to teach a clock buffer circuit coupled to the scanning dynamic logic circuit to generate first, second, and third clock signals in response to a scan clock signal...while the subsequent stages dynamically propagate the test value, as recited in claims 1 and 20; the cited prior arts also fail to teach an output node coupled to the transistors wherein selection of signals...to generate the output from the scanning dynamic logic circuit, as recited in claim 11; and the cited prior arts also fail to teach the step of propagating the test value through the subsequent stages by using the third clock signal, as recited in method claim 18.

2. Claims 1, 4-15, and 18-20 are in condition for allowance. Claims 2, 3, 16, and 17 have been canceled.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
